

## Puff Pocket Square Fold

This is a common fold that allows the square to “puff out” of the pocket. Here is a step-by-step illustration of how this “puff” is achieved:

**Step 1:** Lay your pocket square flat with the two top corners horizontal. Pinch the middle of the pocket square and pick it up.

**Step 2:** As you pick up the pocket square, tuck the sides in as in the diagram.

**Step 3:** With one hand firmly holding the pocket square, use your other hand to gently gather it closed.

**Step 4:** Now gracefully gather up the bottom of the pocket square.

**Step 5:** Tuck as needed and place your pocket square in your jacket pocket.
